Social skills and competences

Ability to work in a team gained through agonistic activity, associationism and work experience where a strongly multidisciplinary approach was indispensable.

Organisational skills and competences

Teaching in Master's courses, photography courses organised by me and organising photography trips have taught me how to organise and get groups of people, sometimes numerous, to work on projects and objectives. In the purely work-related field, on the other hand, I have developed the ability to work in stressful situations, especially related to deadlines.

Technical skills and competences

The diverse range of clients I have acquired over the years has allowed me to refine my photographic technique in several areas and to interpret it in the different photographic languages required by the different markets I have addressed. In recent years, I have improved the aspect of creating and managing the overall communication of a brand.

Computer skills and competences

Excellent knowledge of graphic applications: Adobe Photoshop Lightroom, Adobe InDesign, Adobe Photoshop.  
Excellent knowledge of popular email clients and web browsers.  
Excellent knowledge of Mac OS operating systems.

Artistic skills and competences

Passionate about photography in all its aspects, over the years I have particularly delved into the aspect of perception and photographic language.

Other skills and competences

Passionate about cooking and oenology, I attended professional courses that ended with a short internship at a good restaurant. I played rugby competitively from 1985 to 2003, now I practice hiking.
