KEY

Support	TC	Pigmented cellulose triacetate support	Surface texture	SS	Smooth surface: reflection of light (glossy surface)
	FP	Fibre-based support		RS	Rough surface: diffusion of light (matte surface)
	RC	Resin coated support		TS	Surface with texture: reflection and diffusion of light (semi-gloss surface)
	P	Polyester support	Image structure	CT	Continuous tones
	ML	Laminate support		DCA	Dye clouds and white halos
Image colour and tone	SB	Shift in colour balance	Layers structure	DC	Dye clouds
	F	Fading		IO	The image is in/on paper fibres (paper fibres visible)
	GS	Good dye stability		IA	The image is above paper fibres, in binder/on coating (paper fibres visible)
	US	Uniform and saturated colour		IB	The image is in binder/on coating (paper fibres obscured)
Border	B	Black		State of conservation	1
	W	White	2		Mediocre
	N	None	3		Fair
	SW	White with date optically printed	4		Good
Surface sheen	M	Matte	5		Really good
	SM	Semi-matte			
	SG	Semi-gloss			
	G	Glossy			
	HG	High gloss
